

Research Project:

Construction Site Evacuation Safety

Supported by IOSH

Survey data collected and analysed by FSEG, University of Greenwich

During a wider project running from 2016 to 2019, self-reports of construction worker behaviour related to site evacuation were collected via a questionnaire survey. The data was compiled in an SPSS dataset – see below. Requests to access this dataset for bona fide research purposes may be made by emailing Dr Lynn Hulse (please visit Dr Hulse’s staff profile page for contact details: <https://www.gre.ac.uk/people/rep/las/lynn-hulse>).

	Site	Survey	Age	TimeAtSite	FirstLanguage	EmergencyKnowledge_Procedure	Emergency Knowledge_Correct	InitialLocal
27	100BG	RO	25-34 years	< 1 month	Other	Secure workplace first	No	O
